

# Family Learning Series

The Family Learning Series program is designed to create a partnership between the home and school by reinforcing the curriculum, as well as state and national standards. The program allows time for families to learn and work together in an enjoyable and fun atmosphere, while increasing positive dialogue between school and parents. Families will learn ways to become more involved with their child's academic education. It gives parents the opportunity to spend one-on-one quality time with their child. The Family Learning Series includes Math, Astronomy, Reading, Art, Music, Ceramics and World Language Night. All programs begin promptly at 6:30 pm and conclude at 8:00 pm.

Listed below you will find a brief description of the programs that are offered, along with the registration form. You may print this document and either send in with your child or fax it directly to 609-387-8968. Please remember to complete one registration form per child.
